Safety Training & Services to the Construction Industry

FACT SHEET

SAFE ENTRY INTO CONFINED SPACE TRAINING COURSE – 1 day

For whom the training is intended

The training is intended for persons who are required to enter, or supervise others to enter confined spaces, such as chambers, vats, silos, pumping stations, culverts, sewers, service ducts and excavations.

The Aim of the training

The aim of the training course is to train and assess selected persons in the skills and knowledge required to achieve the standards of competence to identify confined space hazards; implement safe working procedures for confined space entry; use and respond to atmosphere monitoring equipment; prepare and use Saver Demand Flow Breathing Apparatus

The Training Objectives

Using live or simulated conditions and at the end of the course, each course member will be able to:

- Identify the hazards associated with confined spaces
- Understand the relevant Health and Safety legislative requirements
- Select, wear, check and use the correct personal protective equipment
- Identify known and unknown gas atmospheres
- Check, use and respond to atmosphere monitoring equipment
- Understand and work to a permit to work and safe working procedures for confined space entry
- Inspect, clean, assemble, don and wear breathing apparatus
- Work as a member of a team and implement a safe exit in the event of an emergency

The Training Centre holds a certificate of approval for ISO 9001. All courses are carried out in line with the above approval.

Training will be carried out at our 'partner' training centre at Blyth, Northumberland
